**Attachments:** Asbestos RtC Draft 2 10.12.20.docx; Asbestos\_Comments\_Submission Report\_10.12.20.docx

Hello Jennifer,

On behalf of the ICF team, attached is draft 2 of the Asbestos peer review and public comment summary. This version reduces redundancy and some of the detail and includes the cited references. If you would like ICF help to link the reference citations to HERO at a later time after responses have been drafted, please give us a heads up.

Please note the following:

- Comments 15, 17, and 30 are from different organizations, but the content was identical. We summarized 15 and added citations to 17 and 30 wherever we cited 15.
- Comment 44 was replaced with a corrected version comment 57; therefore, we did not analyze comment 44 and it is not cited in the summary. There is a note about this in the comment table.

If EPA wants to look at a particular excerpt in the context of the full comment submission, attached is our *comment submission report* from our CommentWorks tool. The report provides the text of the comment submission letters with the excerpts identified and numbered in brackets. The report includes instructions for finding an excerpt based on the excerpt citation in the summary. If you have any questions, please let me know.

We will send the updated EndNote library of the SACC and public comment references separately.

Regards,

Kim
